WELCOME to the Second Edition of PRO STATE of the art

The therapeutic landscape of prostate cancer evolves continuously, leading to new challenges for the clinicians.

In the last two years new strategies and new agents proved their efficacy in a further setting of this disease. Today, patients with nonmetastatic castration-resistant prostate cancer can be managed with old and new generation androgen receptor targeting agents. Also in metastatic castration-sensitive setting the therapeutic options recently increased with enzalutamide and apalutamide. Looking at the future, the first efficacy data of PARP inhibitors provide new perspectives in the metastatic castration-resistant setting. Furthermore, the role of radiotherapy in the treatment of primary tumor in oligometastatic disease is currently under re-evaluation.

The second edition of the meeting “Pro.State of the Art” represents an opportunity for Italian clinicians involved in the treatment of prostate cancer to share their opinions with Italian and European experts in the fields looking at this fluid landscape which is a challenge in the daily clinical practice.

The “Pro.state of the Art” conference APP!

The conference APP is a novelty of this second edition. A tool that will simplify the participation and interaction during the congress.

The APP has a dual function:

1 – Congress registration

Registration for the conference will be possible only through the APP and will allow, within 3 days from the conclusion of the event, to fill out and send the CME and evaluation questionnaires with a simple click.

To register, please complete the following steps:

- download the APP

- create an account
- once the account has been created, enter your credentials and the event code: **pro2020**
- click “Registration” to enter your data and participate in the CME training.

2 - Interaction

In addition to provide useful information about the meeting and to share documents with the participants, the app increases the interaction and participation in the discussion. During the days of the conference, **Instant Polls and Surveys will be proposed through the APP.**

Please remind to download the APP before the conference begins!
